Art Unit: 3781

1. Claims 2, 9, and 11 are withdrawn from further consideration pursuant to 37 CFR

1.142(b) as being drawn to a nonelected invention as previously set forth.

2. Claims 1, 3-5, 16, and 17 are rejected under 35 U.S.C. 103 (a) as being unpatentable over Rosenow (3145749) in view of either Russell (3161932) or Kurt (308209). Rosenow teaches a head cover with a fastener being a zipper 15. It would have been obvious for one of ordinary skill in the art to provide the magnetic fastener in Rosenow as taught by either Russell or Kurt to provide an alternative fastener.

Regarding claim 5, it would have been obvious for one of ordinary skill in the art to provide at least four magnets in each strip to provide the desired amount of magnets for securely closing the closure.

The combination of Rosenow in view of either Russell or Kurt inherently meets the limitations as set forth in the method claims.

3. Claims 6, 10, 12, and 13 are rejected under 35 U.S.C. 103 (a) as being unpatentable over the Rosenow rejection above in paragraph 5, and further in view of Lauretti (2422245). It would have been obvious for one of ordinary skill in the art to provide a liner as taught by Lauretti to provide added protection.

4. Claims 1, 3-7, 10, 12, and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lauretti in view of Russell (3161932) or Kurt. Lauretti teaches a head cover with a fastener being a zipper 15. It would have been obvious for one of ordinary skill in the art to provide the magnetic fastener in Lauretti as taught by either Russell or Kurt to provide an alternative fastener.

Art Unit: 3781

Regarding claim 5, it would have been obvious for one of ordinary skill in the art to provide at least four magnets in each strip to provide the desired amount of magnets for securely closing the closure.

5. Claims 14-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments have been fully considered but they are not persuasive. In view of the amendment, the rejections with Harding, White and Change is now withdrawn.

6. With respect to the rejections of Rosenow with either Russell and Kurt, in addition to the response as set forth previously, applicant asserts that Russell and Kurt are not in the field of analogous prior art. The examiner submits that it has been held that a prior art reference must either be in the field of applicant's endeavor or, if not, then be reasonably pertinent to the particular problem with which the applicant was concerned, in order to be relied upon as a basis for rejection of the claimed invention. See *In re Oetiker*, 977 F.2d 1443, 24 USPQ2d 1443 (Fed. Cir. 1992). In this case, both Lauretti and Kurt are pertinent to the fastening element being used in the cover. In the field of covering, to use another type of fastening device, such as the device as disclosed in both Lauretti and Kurt are within the skill of one of ordinary skill in the art. Furthermore, the examiner also submits that both Kurt provides clear suggestion for that one to use on a cover.

“the fastener comprising the present invention may be to any form of fabric, cloth, **cover**, garment, apparel, tarpaulin, bag, container, or other device” (col. 4, ln. 6)

Art Unit: 3781

Lauretti also provide similar suggestion to substitute with an ordinary zipper.

“The advantages of the invention to mothers are very great, as all fumbling for fasteners or snap, hook, button or zipper type, is eliminated.” (col. 2, ln. 30).

As with the combination with Lauretti (2422245), the examiner submits that it would have been obvious for one of ordinary skill in the art to provide a liner as taught by Lauretti to provide added protection.

7. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
